

# Mediasite Recorders

Mediasite is designed with your presenters in mind. It automatically records what they say and show and webcasts it live or on-demand – without changing how they present. The patented technology of the Mediasite Recorder automates the capture and delivery of multimedia presentations that combine audio, video and high resolution presentation graphics. The result is the industry's simplest workflow, eliminating time-consuming authoring or post-production work. Plus, seamless integration with your existing audio/video and educational technology means you can confidently scale rich media webcasting throughout your academic or corporate enterprise. Combined with Mediasite EX Server, Mediasite Recorders form the most solid rich media platform to record, stream, archive and manage your organization's knowledge and special events.

## Easy to use

- "Plug and present" design
- Users train, lecture or present as usual with no special technical training
- One-button recording
- Automated recording options
  - Operator-free start/stop recording schedules
  - Remote web-based recording
  - Room automation touch panel recording (RL model)
- No pre-uploading of presentation materials
- Pause/resume live and on-demand recording

## Live and on-demand

- Webcast live from anywhere
- Record on-demand presentations for users to watch at any time
- Archive presentations in online Mediasite Catalogs (requires Mediasite EX Server)
- Publish-to-go (DVD/CD or folder) for playback without Internet access

## Presentation playback

- Watch with all popular browsers for Windows, Mac or Linux
- Navigate by image thumbnails, chapters and DVD-style video controls
- Customizable, brandable Mediasite Players
- Links to additional resources
- Presenter-viewer interactivity with polls and Q&A
- Closed captioning support
- High and low bandwidth support (encoding from 56Kbps to 2Mbps)

## Presentation editing

- Video cropping (beginning/end) and video center-cut
- Replace video file
- Add, delete, update and replace presentation slides
- Adjust slide timings
- Add and customize chapters
- Author new presentations by combining pre-recorded video and images

## Recorder Control Center

*(requires Mediasite EX Server)*

- Simultaneously monitor status and recording activity of multiple Mediasite Recorders
- Confidence monitoring of each recorder's audio, video and image signals
- Start/pause/stop/shutdown recording and control slide advance functions
- Access any Recorder's web interface to remotely control capture settings/options, publish recorded presentations to Mediasite Server, delete presentations and more

## High resolution image capture

- 1920 x 1080 maximum resolution
- Widescreen resolution support
- 480p, 720p, 1080i HD resolutions
- Full motion video support
- Variable bit rate capture to support on-the-fly presentation device changes
- Digital image capture using DVI-I interface
- Optional analog image capture using VGA/HDD15 adapter
- All standard VESA modes

## Video capture

- Composite BNC/RCA
- Component BNC
- S-Video (Y/C)
- NTSC and PAL formats

## Audio capture

- 2 x balanced XLR (stereo)
- 2 x unbalanced RCA (stereo)
- Secondary audio
  - Line in - unbalanced 1/8" TRS (stereo)
  - Mic in - unbalanced 1/8" TS (mono)
  - Line out - unbalanced 1/8" TRS (stereo)

# RL Recorder

## Where to use

- Presentation facilities like lecture halls, auditoriums, classrooms and conference and training rooms

## Unique features

- Compact rack-mount design
- Fully automated recording directly from familiar room automation touch panels

- Mediasite Control Interface Protocol (MCIP) for advanced room control integration

## Design and dimensions

- 2U rack-mountable to standard 19" rack
- Intel-based processor
- 160 GB hard drive (store 1000 hours of content)
- DVD drive (+/- RW)
- Ethernet interface (10/100/1000)
- DVI and DisplayPort out
- Kensington lock for theft protection
- Microsoft® Windows Embedded
- Dimensions: 17.1"(w) x 3.4"(h) x 12.8"(d)
- Weight: 13.5 lbs

# ML Recorder

## Where to use

- Off-site events, conferences, trade shows, multiple venues within your organization

## Unique features

- Built for portability and rapid setup
- Storage for continuous recording of a full day's event
- Large, bright high-resolution display with wide viewing angle suitable for all lighting conditions
- Rugged design with high-impact carrying case (optional ATA-approved wheeled travel case available)

## Design and dimensions

- Integrated 15.4" LED backlit WXGA+ TFT LCD (1440 x 900), LVDS graphics
- Portable keyboard and mini mouse
- Integrated speakers
- Intel-based processor
- 160 GB hard drive (store 1000 hours of content)
- DVD drive (+/- RW)
- Ethernet interface (10/100/1000)
- VGA out
- Kensington lock for theft protection
- Microsoft® Windows Embedded
- Dimensions: 16.6"(l) x 4.4"(w) x 14.6"(h)
- Weight: 13.5 lbs
